Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 May 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on March 11, 2003 was filed before the mailing date of the First Office Action. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show element 24 as described in page 4 of the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "13" has been used to designate both "the flexible element" and "the cord". A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. As disclosed in the specification the flexible element can be made of different forms, for example, a cord, wire, belt, etc (see page 3, lines 23-30). The Applicant should call element 13 a "flexible element" so all the forms can read on the above element number.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3738

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1-3, the word "means" is preceded by the word(s) "first" and "second" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Regarding claim 2, lines 5-7 are not clearly understood. Do the two ends are from the displaceable element or the means? Clarification in the claim is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gramnas WO 96/25898.

Gramnas discloses an implant having a leg prosthesis (not shown) provided with a foot (30), which is connected to the leg via an articulated axle (see ping shown in Figs. 7 & 10; is also connected by elements 4, 15, 17, 18, etc.). The implant discloses a first means comprising a resilient element (18) that first end is connected to the foot (see lower portion of element 18 in Figs. 1 and 11) via an elongated element (17) and which a second end (see upper portion of

Art Unit: 3738

element 18 in Fig. 1) is connected to the leg prosthesis. Additionally, Gramnas discloses a second means (8, 3a, 5, 3b, 22, 9, etc, see figs. 3-5) comprising an element (5') that is displaceable relatively to the leg prosthesis (not shown).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by FR800,547.

FR800,547 discloses an artificial foot comprising a leg prosthesis (1) provided with a foot (2), which is connected to the leg via an articulated axle (7). The implant discloses a first means (8, 9' and 10) comprising a resilient element (8) that a first end is connected to the foot (see lower portion of element 8 in Figs. 1-3) via an elongated element (10) and which a second end (see upper portion of element 8 in Figs. 1-3) is connected to the leg prosthesis. Additionally, FR800,547 discloses a second means (8', 9 and 10') comprising an element (9) that is displaceable relatively to the leg prosthesis (not shown).

Allowable Subject Matter

Claims 2-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion
